

Why **isolved** Wins

vs. ADP Workforce Now

Advantage, **isolved**

Why customers select us:

Third Party Integrations

Robust partner network that easily connects to a wide variety of vendors.

Price Transparency

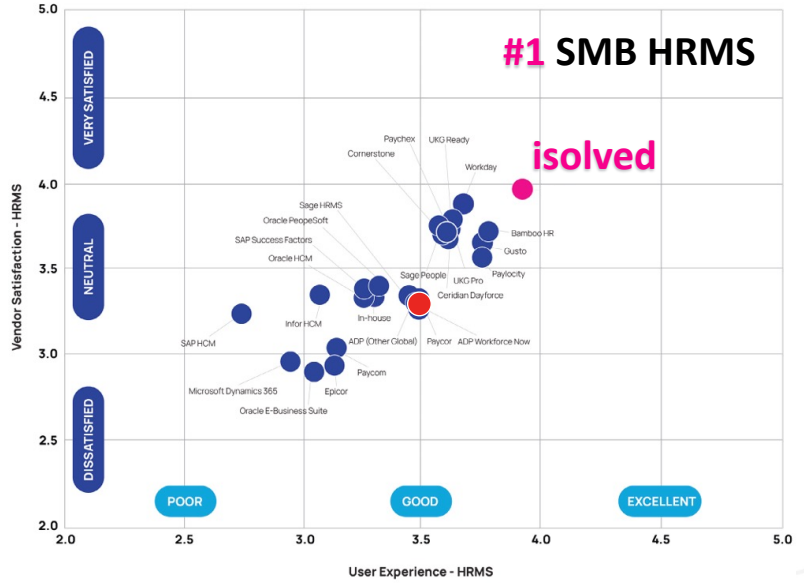

A la carte offerings. No unnecessary products or services. No hidden fees.

Cohesive UX

Single sign-on that feels like one unified product and not several cobbled together.

Analytics & Reporting

Faster and more flexible custom reporting. Easier to navigate.

Sapient Insights 2023 - The longest running and most widely participated in HR Tech Survey w/ + 2500 organizations

Testimonials

Game, set, match, **isolved**

Integrations: "It [**isolved**] connects our FBA accounts, payroll deductions and contributions, and benefits enrollment, and **COBRA** fairly seamlessly so that **integration** of that data is correct across platforms."

Pricing & Versioning: "We were upset that we had **old software** [**ADP**] (at least 12 years old) and were paying the "market" price. We learned that most clients were paying almost **HALF** of our rate."

UX: "A **scavenger hunt** was needed every time I needed to download my tax documents. My association with **ADP** was a tax disaster that took nearly 2 years to resolve."

Reporting: "What I like least about **ADP** workforce now is that some of the features are too **simple** and don't go into detail enough such as reporting and analytics tools."

Implementation: "[**isolved**] went **above and beyond** to ensure our **setup** was done accurately and on time. . . In addition, she followed up after the implementation to ask if we needed any additional help."
